

Career Opportunities: Product Manager

Siemens A/S, Flow Instruments is the centre of competence for flow measurement within the Siemens group and supports Siemens' role as the leading supplier of automation solutions for industry. We develop and manufacture high-tech flow meters, which are used in process control, process optimization and billing applications, world-wide. Siemens Flow Instruments is headquartered in Nordborg, Denmark.

Product Manager for SITRANS F M

Siemens A/S, Flow Instruments in Nordborg (Siemens Flow Competence Centre) is seeking a dynamic and international oriented Product Manager for SITRANS F M Marketing with drive and commitment to manage the current and future portfolio of electromagnetic flowmeters.

As part of the SITRANS F M Marketing Team your main area of responsibility is to ensure continued development of the SITRANS F M product portfolio and secure a competitive product portfolio for our strategic focus areas.

Your primary responsibilities

- Portfolio management in cooperation with Global Sales, Operations, Logistics and R&D
- Strengthening of the sales and application expertise support to our global sales organization
- Participate in planning, development and implementation of market introductions in close cooperation with sales promotion and Siemens global sales organization
- Responsible for update of technical literature, application and promotion material
- Participate in establishing strategies, goals and roadmaps for the magnetic flow meter business
- Participate in the planning, development and conduct of technical seminars and training courses for the sales organization internal/external
- Cooperate on an ad hoc basis on cross-functional tasks

Your profile

- E/M Engineer with a “creative spirit”, preferably supplemented by business qualifications and 3-5 years experience as product manager within process instrumentation
- Ideal candidate has in-depth knowledge with Siemens Automation systems and products such as SIMATIC PDM, SIMATIC Step7 or Profibus
- Structured, result oriented with good communication skills and a team player
- Good command of English and German at negotiation level
- Good technical knowledge of instrumentation and process automation

We offer

- A challenging job in a dynamic, international organization with good personal development and career opportunities
- Inspiring co-operation and global network with dedicated colleagues in an international organization ranking among the world leaders within process instrumentation
