R&D Engineers - Maersk Container Industry AS, Tinglev, Denmark

R&D Engineers

Maersk Container Industry

Maersk Container Industry AS (MCI), a part of A.P. Moller-Maersk Group, is a global company manufacturing world-class transportation equipment solutions to a global customer base.

Research and development within MCI are in the absolute forefront, with new technologies and principles constantly explored and tested. MCI utilizes a vast network of universities and other industries to co-operate with. The creative, inspiring and resourceful environment ensures MCI's unique position as the market leader in terms of innovation, quality and energy efficient products.

The MCI headquarter is located in Tinglev, Denmark, while the three production sites are in China. Today, MCI Group employs about 5.700 people and offers three unique products: dry containers, reefer containers and Star Cool reefer machines. For more information go to www.mcicontainers.com.

The job

To be a part of a highly engaged team and based at our headquarter, we are currently seeking experienced R&D Engineers. The positions include fully and partly responsibility for projects in the development of the next generation of reefer containers. You will have the possibility to follow the ideas from sketch to building prototypes to full scale testing in our test chambers. The work will be carried out in close cooperation with our Chinese colleagues and external specialist placed around the globe. Travel activity up to 25 days per year must be expected.

As R&D engineer, your primary tasks are:

- Construction and testing of prototypes
- Participate in cross functional project teams
- Develop monitoring systems for reefer containers
- Solve technical problems related to the production of reefer containers.
- Generate ideas for future projects

Your profile

Your educational background should be in engineering, preferably mechanical or mechatronics. In order to succeed in the job, you have five years' practical experience within engineering. You are used to being a co-driver or driver of your own projects and have the ability to work closely together with production, procurement and sales.

As a person you are analytic and have the ability to see through complex technical problems. It is important that you have a creative and innovative mindset and that you like to be challenged to think out of the box. You have a strong team spirit and prioritize to be a good colleague - thereby contributing to the creation of motivation, loyalty and a strong company identity. Finally you are a self-starter and have a dynamic approach to new tasks.

Career

We offer you a challenging and exciting job in a well-established and informal international company facing larger growth over the next couple of years. You and your area of responsibility will grow accordingly, providing you with good career opportunities.
