Talented Programmer

- for a fast growing global IT security company

Secunia is on a mission to help businesses and private users manage and eliminate the threat of unpatched vulnerable software and always strive to deliver the best possible products, research, and intelligence through a passion for what we do and where we want to go. Currently, the Secunia Software Inspector solutions are second to none. They are unique in accuracy, performance, and coverage - it must continue to stay that way. This can only be achieved by continuous development, innovation, and improvement of the functionalities and features of the solutions.

As part of our on-going hyper growth expansion in 2011, Secunia are looking for more skilled and dedicated employees. If you are a dedicated programmer with a good, solid background in application development using a variety of tools and languages then we have a challenging position for you within development of our state of the art software and backend solutions. As we develop solutions for Microsoft Windows, Linux, Unix, and web platforms using a variety of technologies, you

must be flexible with regards to choice of technology and languages. Programmers who show the right technical and project management skills may be promoted to team leaders with a greater degree of responsibility for the individual products and projects.

It is important that you have practised secure programming - or have a strong desire to learn it - and understand the importance of always following best practises when designing applications and writing code. Knowing that writing 100% secure code is an illusion, Secunia will always strive to ensure that our code is of a high quality and without the usual common programming flaws and errors made by so many other software companies in their rush to getting new products on the shelves.

At Secunia we always strive to be the best, and expect nothing less from you. Therefore, you must be prepared to work in a fast paced environment where we always strive to deliver the best possible solutions.

Qualifications

- Strong programming skills with a good, solid background in application development using a variety of tools and languages

- Experience with usability and UI design

- Experience with application development

- Understanding of secure coding practises

- A good understanding of Windows, Unix, and Linux systems design

- A solid theoretical background in software design and development

- Ability to communicate fluently in English (verbal and written). Danish is not mandatory

- Passionate about the quality of your work

Application

Please send your application and CV marked "Talented Programmer" to tk@secunia.com, stating where you have seen this advertisement. Applicants from other countries are offered assistance regarding relocation including obtaining a work permit and finding proper accommodation.

About Secunia

As a world-leader within IT security and Vulnerability Management, Secunia plays an important role in helping businesses and private individuals worldwide manage and control vulnerability threats. The valuable contribution that Secunia has made to revolutionise the industry with market-driven product

development has been recognised by, among others, Frost & Sullivan, Ovum, and Online Trust Alliance (OTA).

Secunia holds a market leadership position in EMEA and is rapidly expanding global reach through strategic partnerships worldwide. More than 90 'Secunians' representing over 15 nationalities are located at the Copenhagen headquarters, working in Sales, Research, Development, Marketing, and Business Administration. 'Secunians' share a desire for becoming the best in their field, therefore Secunia provides a challenging, professional, and fun working atmosphere with excellent possibilities to develop skills.
