Deltek Know more. Do more.™

software developers
– build the ERP solutions of tomorrow

Are you a highly skilled developer with a flair for integration and technology? Do you have programming experience and knowledge of business processes? Deltek, which recently acquired Maconomy, is investing heavily in the future. Right now we need 3 more software developers to develop the Maconomy solution and collaborate with development colleagues all across the globe.

dansk

java, web services, process modelling

You will join a strong development team in Copenhagen that drives the development of tomorrow's ERP solutions to create unrivaled value for project-focused organizations. Learning from some of the most experienced software developers in Denmark, you'll play a key role in integrating various software products from Deltek and other vendors to Maconomy. This includes applications such as MS Share-Point and MS Outlook. Your main weapons include Java, Eclipse RCP, web services and process modelling.

We are working on a number of exciting development projects these years, and you will be assigned to the project that best matches your skill set and areas of interest. You will be involved every step of the way from customer communication to design, implementation, testing, and maintenance.

Deltek welcomes you in an ambitious software development unit with a highly professional environment. You will join an international and innovative company with excellent potential for personal development. Our office is attractively located in Østerbro, Copenhagen.

methodical, curious and customer-focused

We imagine you have a degree in computer science or civil engineering, but you might have another relevant education in software development with a focus on business processes. You take pride in delivering high quality and you have a keen interest in technology while never losing sight of the customers' needs. Preferably you also have some knowledge of business processes in ERP solutions.

You already have experience with business software development, Java programming, web services/web part development and/or other types of integration to Microsoft products. Technical challenges stimulate you, and yet you are able to produce specific deliverables to customers. You are a flexible team player who communicates effortlessly in English and/or Danish.

contact us

For more information about the positions, please contact Development Manager Anne Hellung-Larsen on (+45) 2526 2376 or ahe@maconomy.com. We will start interviewing from February 22, so please send your application as soon as possible titled "Software Developer" to job02@maconomy.com.

About Deltek

Deltek and Maconomy recently merged to create the leading global provider of enterprise applications software and solutions designed specifically for project-focused businesses.

For decades, we have enabled government contractors and professional services firms to automate critical workflows around the engagement, execution and delivery of projects.

Over 13,000 clients use our solutions to measure results, optimize performance, streamline operations and win new business.
