

Energy Utilisation Specialist

Denmark

Job reference:DK02478

Do you have technical knowledge within electrical, cooling, water, waste water and/or thermal systems, and do you want a job with freedom to create high impact on a global level? If so this is your opportunity. You will join Projects & Technology in Kolding, however as expert you will have all of Europe and/or North America as your workplace. Projects & Technology is responsible for identifying and implementing utility saving projects in industry. We cover technology, change management and software and we are selling performance, not products.

Identify and quantify energy saving opportunities within industries

As Energy Utilisation Specialist your primary focus is to identify and quantify utility saving opportunities within industries. Your work mostly takes place at customer facilities in Europe and North America but could also include globally smaller projects and energy audits. You are expected to travel +120 days per year, and your place of living could be e.g. Germany, the UK or elsewhere in the EU. In details you have responsibility for:

- site, application and equipment efficiency analysis including relevant calculations and measurements
- performing energy/utility audits to identify saving potential within both technical and behavioral improvement
- preparing technical specifications
- calculating saving and investment costs
- preparing reports and presentations
- technical advice during the implementation process
- verification of actual savings achieved

+10 years' experience as Utility/Energy Advisor

You have an Engineering degree at Master's level – mechanical, chemical, environmental or energy. Added to this, you have +10 years' experience from a career as Utility/Energy Advisor within food, beverage, pulp & paper or another process industry. This has provided you with technical knowledge of utility supply systems and end-use applications. Your travel experience has sharpened your ability to cover more roles when needed, and you are used to take benefit of your English and German language skills. You have a highly structured work approach and you are used to creating results on your own without losing the ability to perform as part of a team. You can also perform within a frame of defined processes and tools. Finally, it is crucial that you are able to communicate on all levels with a genuine multicultural approach.

For further information about the position,

please contact Henning B. Frisk, Director of Projects and Technology, at +45 2361 2294.

Danfoss A/S is one of Denmark's largest industrial companies. We have an annual turnover of around DKK 22 billion, and have around 26,000 employees worldwide. We provide solutions within Climate and Energy, a sector we see as a major driving force in the future world economy. We show leadership in business through reliability, excellence and innovation. No matter where you find yourself at Danfoss, the customer is at the center. Our work reflects our corporate behavior; trustworthy, innovative, global, with respect for local cultures and constantly working towards

sustainable results.
