

## Lead Enterprise Architect

Danfoss IT  
Denmark

**Job reference:**DK02391

Can you ensure that Danfoss has the right systems and processes in order to deliver robust and flexible solutions. Then apply for this exciting job as Lead Enterprise Architect and have the opportunity to add value to our business.

### Support our IT architecture

You will have primary responsibility for establishing and managing Danfoss' Global Competency Centre, Enterprise Architecture, consisting of a highly professional IT Architects team. You will contribute to building up the team, and as such you can look forward to a job in which your leadership and operational skills will be challenged.

Your function is to ensure that our applications, processes and data support our business and that the information flows efficiently between our systems. Moreover, it is your task to define and conduct competency development sessions for your IT Architect and IT Consultant colleagues. In this way, we ensure that we have the right competencies in the organisation at all times. You identify optimisation projects and ensure that the development is coherent cross-organisationally. In addition, you will be focusing on applying the budgets as cost-consciously as possible.

### IT architectural experience, solid business knowledge or technical skills

There are several entries into this job. Either you can have a solid IT background and experience working with IT Architecture – preferably from a company using SAP and MS. Or you have acquired solid business-oriented knowledge or a technical flair, which uphold the fact that you do not yet have many years' experience of IT architecture. If you are the one for this job, we offer you the necessary education. In any case you take responsibility and are able to add value to our business. As a person you are characterised by your sound cooperation skills and a structured approach to your tasks. You manage to communicate complex issues in a clear and cohesive manner, and you maintain your comprehensive view – even when days are busy and filled with many simultaneous tasks. You are curious by nature and have the courage to develop yourself in tune with your job, and you do your part in making the wheels turning.

### For further information about the position,
