

Product Development Engineer

Denmark

Job reference:DK02528

Danfoss Product Development DK in Kolding is responsible for the development of controls for refrigeration and air conditioning applications. We focus on maintaining our position and to continue our growth perspective as one of the leading players on the refrigeration and air conditioning market. Therefore we need to strengthen our focus on product development and speed up the time to market of new products in order to serve our customers.

Focus on innovation and development in a global company

You will be a central figure in the development of new products to the refrigeration and air conditioning business area. In this job you will be working with flow, structural analysis and magnetic calculation, LEAN product development and design for Six Sigma. Moreover, you will have access to a strong laboratory back-up and a well-equipped prototype workshop. In detail, you develop the concepts, make the prototypes, design and test the products, produce the documentation and, finally, ensure authority approval. You will be working in an international team and take the results of the development efforts fast and effectively to the market and into running production.

Solution-oriented Engineer

You have a background as Mechanical or Mechatronic Engineer at minimum Bachelor's level. Your technical insight has given you the ability to quickly grasp problems and find good and sustainable solutions. In addition, you are focusing, both technically and commercially, on our customers' needs. You have a result-oriented mindset and an eye for delivering in time and thereby contributing to keeping the milestones.

For further information about the position,

please contact Director Product Development, Søren Michael Larsen at +45 2165 2615.

Danfoss Refrigeration & Air Conditioning Controls includes four product areas: Automatic Controls, Food Retail, Industrial Automation and Heat Exchangers. We develop, produce and supply solutions within commercial and industrial refrigeration, air-conditioning, supermarket refrigeration and industrial automated systems for global OEM customers and end users.

Danfoss A/S is one of Denmark's largest industrial companies. We have an annual turnover of around DKK 22 billion, and have around 26,000 employees worldwide. We provide solutions within Climate and Energy, a sector we see as a major driving force in the future world economy. We show leadership in business through reliability, excellence and innovation. No matter where you find yourself at Danfoss, the customer is at the center. Our work reflects our corporate behavior; trustworthy, innovative, global, with respect for local cultures and constantly working towards sustainable results.
